

Agentic Security Assessment

Configuration Report: NSG remediation

Agent ID:	agent-b9758c13
Generated:	2025-08-26 17:34:03 UTC
Report Type:	Current State Configuration
Integration:	Azure SDK + LangGraph
Version:	1.0.0

This report provides a comprehensive overview of the current configuration state for the agentic security assessment system. It includes detailed information about agent settings, integration status, workflow configuration, and execution capabilities. The system integrates both Azure SDK for direct cloud resource management and LangGraph for advanced workflow orchestration, providing a robust platform for automated security remediation with rollback capabilities.

Table of Contents

- 1. Executive Summary
- 2. Agent Configuration
 - 2.1 Basic Settings
 - 2.2 AI Model Configuration
 - 2.3 Execution Configuration
- 3. Current State
 - 3.1 Workflow Status
 - 3.2 Active Sessions
- 4. Integration Status
 - 4.1 Azure SDK Status
 - 4.2 LangGraph Status
- 5. Workflow Configuration
 - 5.1 Workflow Steps
 - 5.2 Validation Rules
 - 5.3 Rollback Configuration
- 6. Appendices
 - 6.1 Raw Configuration Data
 - 6.2 System Requirements
 - 6.3 Troubleshooting Guide

1. Executive Summary

Configuration Item	Status	Details
Agent Status	✓ Active	Agent agent-b9758c13 configured
Azure SDK	✗ Inactive	Subscription: None
LangGraph	✓ Active	Workflow: Initialized
Validation Mode	✗ Inactive	Disabled
Rollback Capability	✗ Inactive	Disabled

Key Highlights:

- Agent configured with default AI model
- Manual execution mode
- 0 workflow steps configured
- Integration status: Azure SDK (✗), LangGraph (✓)
- Current active workflows: 0

2. Agent Configuration

2.1 Basic Settings

Setting	Value
Agent ID	agent-b9758c13
Name	NSG remediation
Description	

2.2 AI Model Configuration

Setting	Value
Model Name	gpt-4o
Temperature	0.1
Max Tokens	2048

2.3 Execution Configuration

Setting	Value
Validation Mode	Enabled
Automated Execution	Disabled
Rollback Enabled	Enabled

3. Current State

No active workflow state available.

4. Integration Status

4.1 Azure SDK Status

Property	Status	Details
Available	✗ Inactive	Not configured
Subscription ID	Not set	
Clients Initialized	✗ Inactive	Not initialized
Last Check	Recent	2025-08-26T17:34:03.379481

4.2 LangGraph Status

Property	Status	Details
Available	✓ Active	Library installed
Workflow Graph	✓ Active	Initialized
Memory Saver	✓ Active	Enabled
Active Workflows	Info	0

5. Workflow Configuration

5.1 Workflow Steps

1. Initialize
2. Analyze Finding
3. Generate Plan
4. Validate Plan
5. Execute Remediation
6. Validate Execution
7. Complete

5.2 Configuration Details

Setting	Value
Checkpoint Enabled	Yes
Max Iterations	10
Custom Validators	0

6. Appendices

6.1 Raw Configuration Data

```
{ "agent_configuration": { "agent_id": "agent-b9758c13", "name": "NSG
remediation", "description": "", "model_configuration": {
"model_name": "gpt-4o", "temperature": 0.1, "max_tokens": 2048 },
"execution_configuration": { "validation_mode": true,
"automated_execution": false, "rollback_enabled": true },
"integration_configuration": { "use_azure_sdk": true, "use_langgraph":
false, "use_autogen": true, "azure_subscription_id":
"0a519345-d9f4-400c-a3b4-e8379de6638e", "azure_resource_group": null,
"autogen_config": { "llm_config": { "model": "gpt-4o", "temperature":
0.1, "max_tokens": 2048 } } }, "workflow_configuration": {
"workflow_steps": [ "initialize", "analyze_finding", "generate_plan",
"validate_plan", "execute_remediation", "validate_execution",
"complete" ], "checkpoint_enabled": true, "max_iterations": 10 } },

```

6.2 System Requirements

- Python 3.8 or higher
- Azure SDK for Python (azure-identity, azure-mgmt-*)
- LangGraph (optional, for advanced workflows)
- OpenAI or Azure OpenAI API access
- Valid Azure credentials (Client ID, Client Secret, Tenant ID)
- Network access to Azure APIs
- Sufficient permissions for resource management

6.3 Troubleshooting Guide

Issue: Azure SDK not available

Solution: Ensure Azure credentials are properly configured in environment variables or Azure CLI

Issue: LangGraph not working

Solution: Install LangGraph with: `pip install langgraph`

Issue: Workflow execution fails

Solution: Check agent configuration and ensure all required parameters are set

Issue: PDF generation fails

Solution: Install ReportLab with: `pip install reportlab`

Issue: API connection errors

Solution: Verify network connectivity and API endpoints
