

Securra Security Compliance Report

CIS Compliance Report - Security Scan

Report Details

Report ID:	report-cis-ef47cf
Type:	CIS
Environment:	production
Status:	generated
Created:	2025-08-13T21:35:51.290714
Generated:	2025-08-13 16:05:59
Scan ID:	scan-d07a8f66

Compliance Score

80%

Executive Summary

Good security posture with 80% CIS compliance. 1 critical findings require immediate attention. 5 high-priority issues identified.

Recommendations

1. Enable MFA for all privileged accounts in Azure AD
2. Disable public blob access on storage accounts
3. Review and restrict Key Vault access policies
4. Enable SQL Database auditing and log analytics
5. Restrict NSG rules to specific IP ranges
6. Install and configure endpoint protection on all VMs
7. Enable Security Center standard tier for enhanced protection
8. Configure Log Analytics workspace for centralized logging
9. Enable WAF on Application Gateway with OWASP rules
10. Configure Azure Backup for all critical resources

Scan Metrics

Metric	Value
Total Checks	120
Passed Checks	96
Failed Checks	24
Critical Issues	1
High Issues	5

Security Findings

Multi-factor authentication not enabled for privileged users

Severity: CRITICAL

Resource: N/A

Description: Global administrators and subscription owners should have MFA enabled

Storage account public access not restricted

Severity: HIGH

Resource: N/A

Description: Storage accounts allow public blob access which poses security risks

Key Vault access policies too permissive

Severity: HIGH

Resource: N/A

Description: Key Vault has overly broad access policies assigned

SQL Database auditing not enabled

Severity: HIGH

Resource: N/A

Description: SQL Database auditing is not configured for compliance monitoring

Network security groups allow unrestricted access

Severity: HIGH

Resource: N/A

Description: NSG rules allow traffic from any source (0.0.0.0/0)

Virtual machines lack endpoint protection

Severity: HIGH

Resource: N/A

Description: VMs do not have antimalware or endpoint protection installed

Security Center standard tier not enabled

Severity: MEDIUM

Resource: N/A

Description: Azure Security Center is not configured with standard tier

Log Analytics workspace not configured

Severity: MEDIUM

Resource: N/A

Description: Centralized logging is not properly configured

Application Gateway WAF not enabled

Severity: MEDIUM

Resource: N/A

Description: Web Application Firewall is not enabled on Application Gateway

Backup not configured for critical resources

Severity: MEDIUM

Resource: N/A

Description: Azure Backup is not configured for VMs and databases
